

Shravani Kalapure

kalapureshravani@gmail.com | [LinkedIn](#) | [GitHub](#) | [LeetCode](#) | [Portfolio](#)

Education

Pimpri Chinchwad College of Engineering (PCCOE) <i>B.Tech in Computer Engineering, Minors: Generative AI</i>	2023 – 2027 <i>CGPA: 7.75/10</i>
Kendriya Vidyalaya CME <i>12th CBSE</i>	<i>93%</i>
Kendriya Vidyalaya CME <i>10th CBSE</i>	<i>94%</i>

Technical Skills

Languages: Python, C, C++, SQL, Java

Full Stack & Web: React.js, Next.js, Node.js, Express.js, Tailwind CSS, WordPress, REST APIs

AI & Data Science: scikit-learn, TensorFlow, Keras, OpenCV, NLP, EDA, Classification/Regression, Matplotlib, Seaborn

Databases & ETL: MongoDB, MySQL, Data Cleaning, Preprocessing, ETL

Tools & Platforms: Git, GitHub, VS Code, Power BI, Excel, AWS (EC2, S3, IAM), Jupyter Notebook

CS Fundamentals: Data Structures & Algorithms, DBMS, Computer Networks, OOP

Experience

WordPress Developer Intern — Mrira Designs & Dhritsthal (Client Projects) **Mar 2026 – Apr 2026**

- Transitioned mriradesigns.com and dhritsthal.com to production, resolving Hub theme issues and managing GoDaddy deployment and hosting workflows.
- Documented deployment processes and UI update procedures; collaborated with the team to deliver project requirements within sprint deadlines.

Projects

DocuMind – Document Q&A with RAG

[GitHub](#)

React, FastAPI, LangChain, FAISS, Sentence Transformers, Ollama

- Built a local RAG-based document Q&A application using React and FastAPI, enabling users to upload PDFs and query their contents.
- Implemented semantic retrieval using `all-MiniLM-L6-v2` embeddings and FAISS to retrieve relevant document chunks before generating answers with Llama 3.2 via Ollama.
- Integrated source retrieval into the interface to display relevant document context alongside generated responses.

Online Appointment Booking System

[GitHub](#)

Next.js, React, Node.js, Express.js, MongoDB, JWT

- Collaborated cross-functionally to design and deliver a full-stack healthcare scheduling platform supporting 50+ doctor profiles with real-time slot validation.
- Implemented JWT + bcrypt authentication; documented system architecture, REST APIs, and workflows systematically for handoff and maintenance.

Eco-Snap – AI Receipt Scanner

[GitHub](#) | [Demo](#)

OCR, Full-Stack APIs

- Built an ETL pipeline to extract, transform, and load receipt data via OCR; developed REST API backend and React frontend for automated expense categorisation and insight generation.

SMS Spam Detection

[GitHub](#)

Python, Scikit-learn, NLP, Logistic Regression, Naive Bayes

- Applied NLP techniques and statistical analysis to build a spam classifier in Python.
- Performed EDA and feature engineering using TF-IDF, achieving 95%+ accuracy.

Leadership, Achievements & Certifications

- Copyright granted (2025) for Crop Disease Detection using CNNs, achieving 90%+ accuracy in plant disease classification.
- PR Head, PCCOE ACM Student Chapter.
- Attended ACM Summer School 2024 on Generative AI at Kalasalingam Academy of Research and Education, Madurai.
- Certifications: Data Analysis, SQL, Tableau, Power BI and Excel (Udemy) — Data Science Bootcamp (GeeksforGeeks).
